# Hazardous Weather

## Day 1 Weather Hazards

Valid: 0800 Thu - 0800 Fri

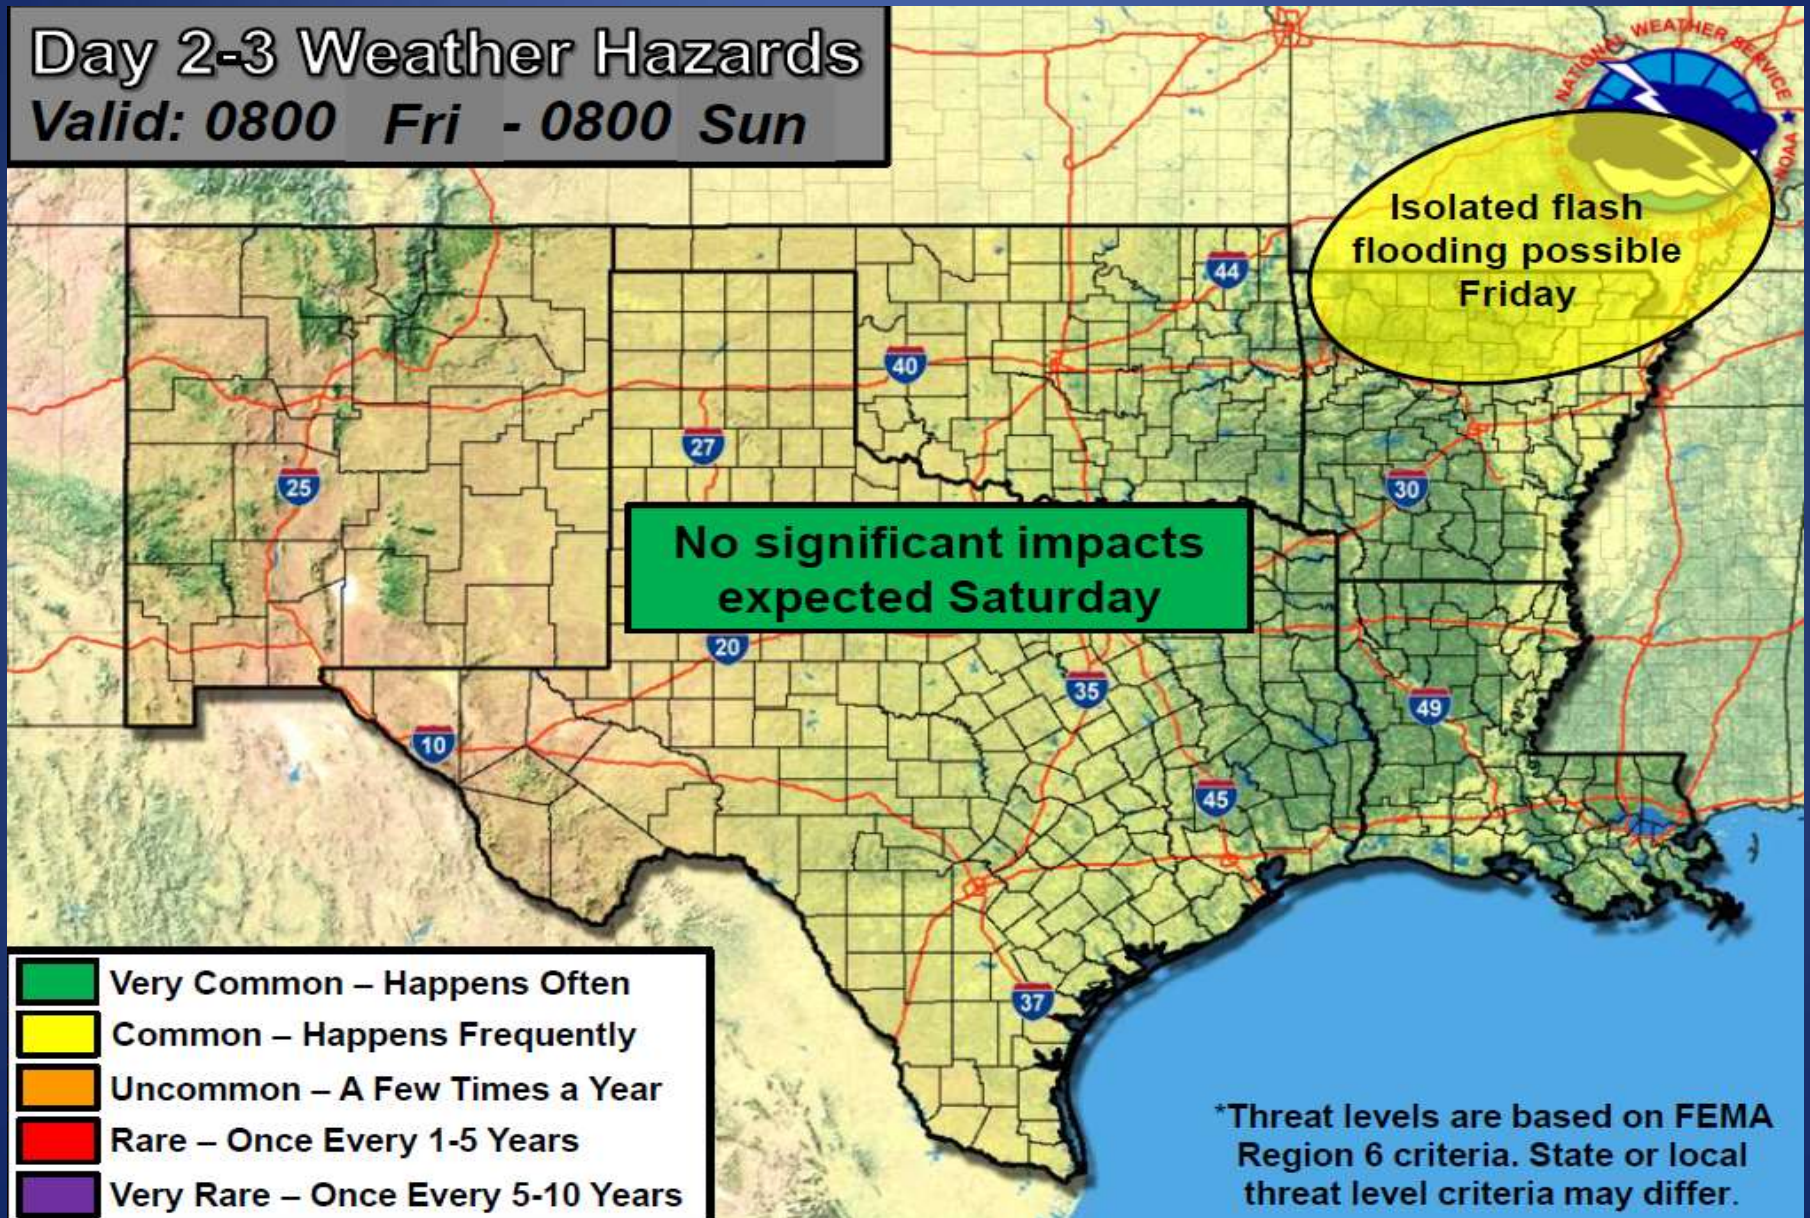

# Hazardous Weather

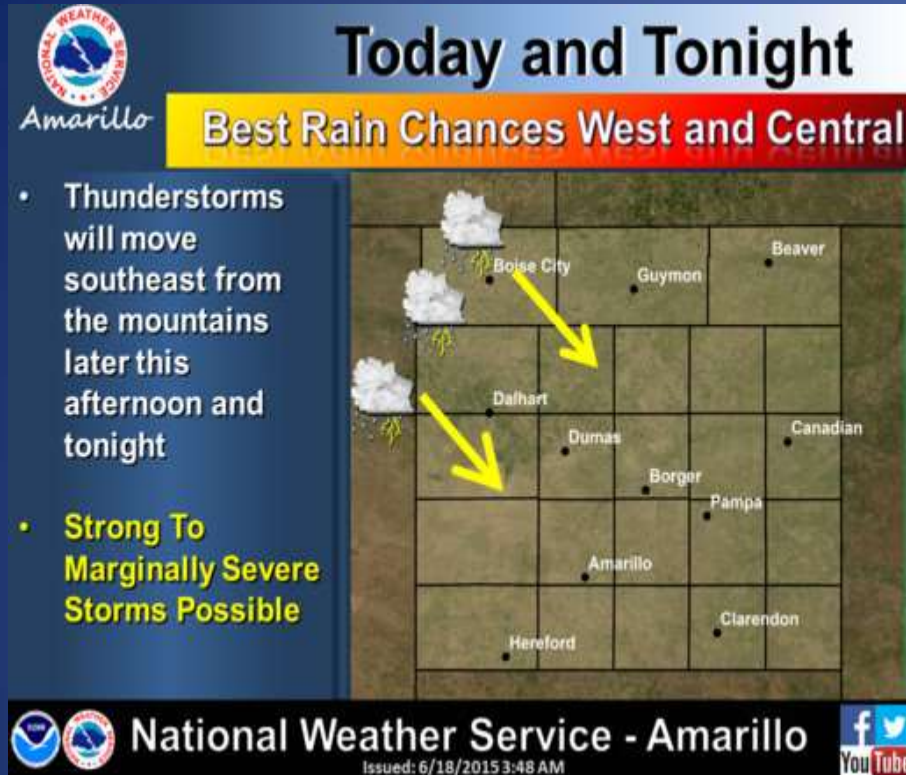

**Day 2-3 Weather Hazards**

**Valid: 0800 Fri - 0800 Sun**

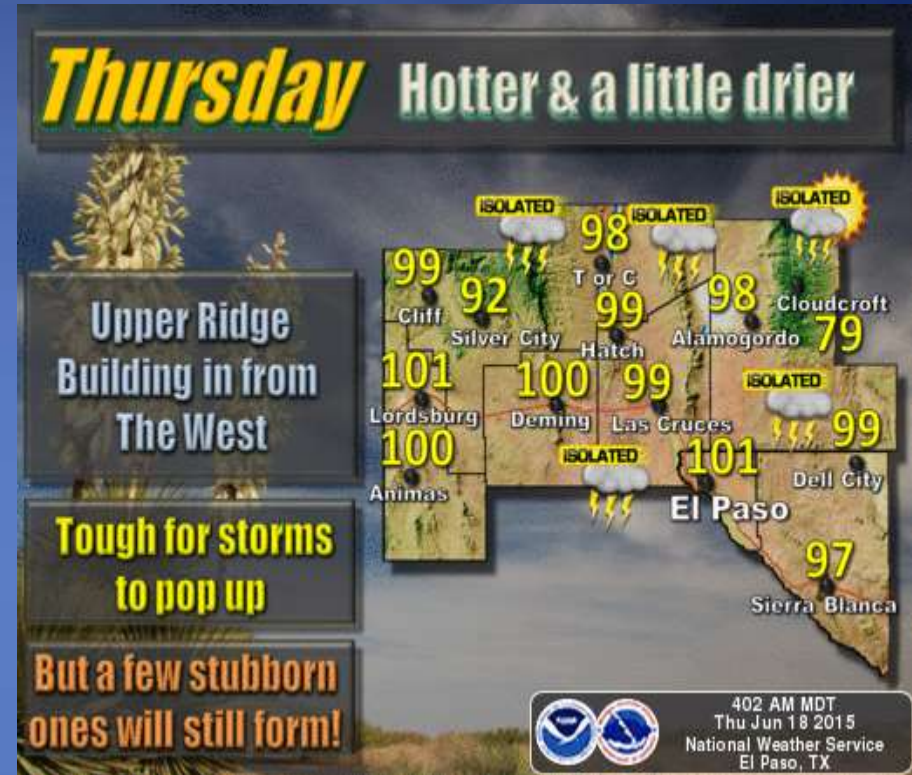

# Hazardous Weather

Thunderstorms will move southeast from the mountains later this afternoon and tonight. The best chance of rain will be across the western and central panhandles. A storm or two may become severe with hail to the size of quarters and wind gusts to around 60 mph.

High pressure in the upper atmosphere will continue to build eastward over the Borderland...making it tougher for thunderstorms to form. However...low level moisture continues to seep in from the east so a few thunderstorms will still be successful in forming. Most of these will be east of the continental divide...and especially east of the Rio Grande. And El Paso should finally register its first triple digit temperature of the year...though not many are looking forward to this. At least we'll be 12 to 15 degrees cooler than Phoenix!

# Hazardous Weather

## Thunderstorms

Thunderstorms will be possible today through tonight across SE New Mexico and parts of W Texas. The main threat with these storms will be brief heavy rainfall.

**NWSMidland**  
[weather.gov/midland](http://weather.gov/midland)

303 AM CDT  
Thu Jun 18 2015  
National Weather Service  
Midland/Odessa, TX

Another round of thunderstorms is possible today and tonight across parts of West Texas and southeast New Mexico. Brief heavy rain will be the main threat with these storms.

## Flash Flood Watch

For counties shaded in green until through **10PM Tonight**

Hourly rainfall rates of 2-3 inches per hour will be possible.

- A Flash Flood Watch means that heavy rainfall may lead to Flash Flooding. *Flash Flooding is a very dangerous situation.*
- Ensure that you have multiple ways to receive warnings (such as radio/TV, NOAA Weather Radio, Smartphone apps, etc.)
- Monitor later forecasts and be prepared to take action should Flash Flood Warnings be issued.
- Remember:  
**TURN AROUND,  
DON'T DROWN.**

@NWSSanAntonio

316 AM CDT  
Thu Jun 18 2015  
National Weather Service  
Austin/San Antonio, TX

Isolated to scattered heavy rainfall is expected again today along and east of the I35 corridor. With rain rates of 2-3 inches per hour possible, flash flooding will again be a threat across the watch area. Continue to be mindful of flooded areas and low water crossings if needing to commute today.

# Hazardous Weather

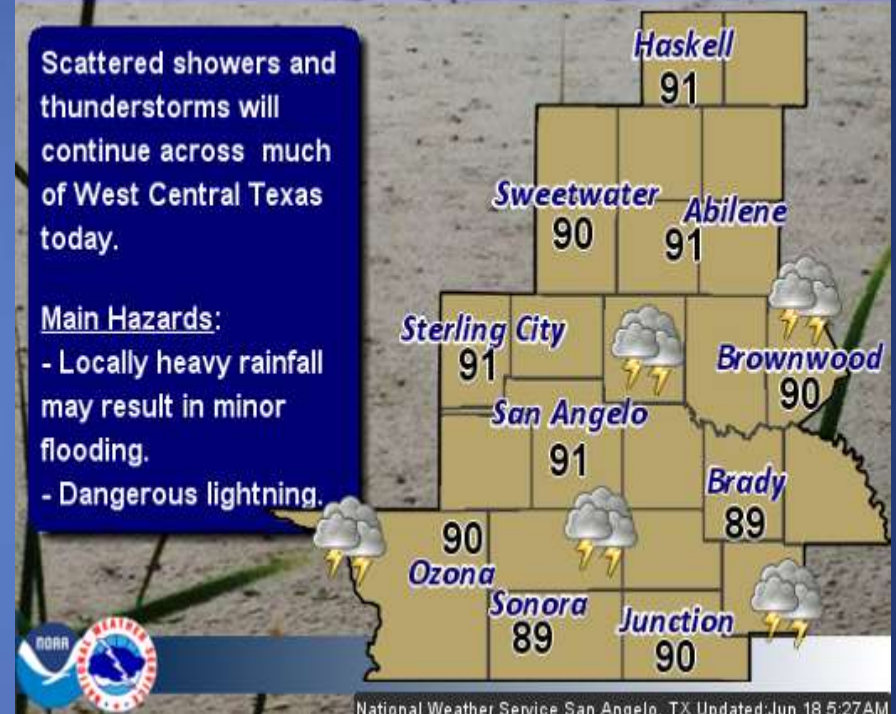

## Scattered Showers and Thunderstorms Today

Scattered showers and thunderstorms will continue across much of West Central Texas today.

### Main Hazards:

- Locally heavy rainfall may result in minor flooding.
- Dangerous lightning.

Scattered showers and thunderstorms will continue across West Central Texas today...mainly along an east of a Baird to San Angelo to Ozona line. The main hazards will be locally heavy rainfall which may result in minor flooding and dangerous lightning.
